

## EXTRA STRENGTH • BETTER GRIP • LONGER LASTING

Dollar for dollar these commercial-grade 1" tie-downs are among the best available. By eliminating excess packaging, we were able to put the cost savings back into the product design. Built to last, they provide the performance your most demanding customers need. At the same time, we reduced post-consumer waste tied to plastic clamshells and frames which is often a concern for contractors on the job site. If you're looking to attract more contractor business or just want to offer a higher quality option to your existing customers, these tie-downs are a must.

- 1,000 LBS Working Load Limit (3,000 LBS Breaking Strength)
- Heavier duty 3,500 LBS polyester webbing for greater abrasion resistance
- .085" thick chromate coated steel ratchet that won't bend or break like less expensive options
- Longer flared open handle for better grip and ratcheting action
- 15" fixed end to help keep ratchets above the pickup truck rail for easier access
- Packaged in a recyclable shelf display box for simple merchandising
- Individually UPC coded for retail sale
- S-Hook version available in 6', 12', 16' & 20' lengths
- New J-Hook version available in 16' length only
