MADE IN U.S.A. FOR

# HOLDIT KEEPS CARGO IN ITS PLACE

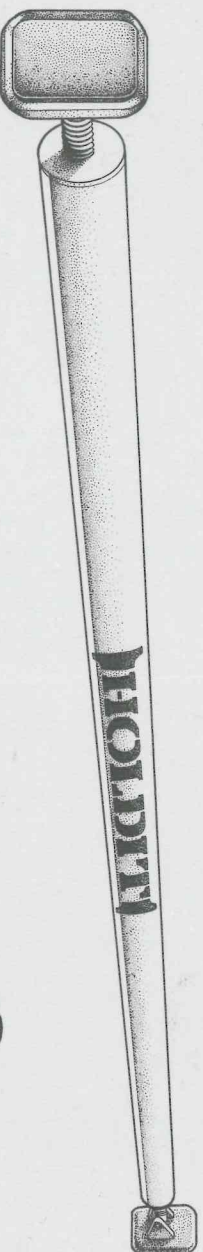

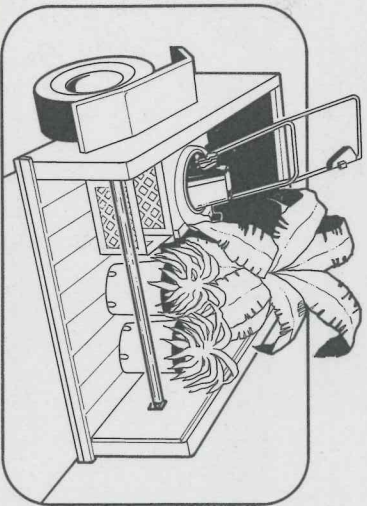

Ideal for

Pickups

Vans

## The easy, one-step way to keep a load from shifting.

HOLDIT is faster than rope or twine, more secure than bungee cords. It works inside the bed, so no tie-downs are required—works great with bedliners, too!

## One twist it's in... one twist it's out.

HOLDIT is easy to use.

The first time you use it, extend the ends evenly to within 1/2-inch of the required width, taking care not to extend either end beyond nine inches. Then set the neoprene-covered foot against one side of the bed and twist to tighten—no tools are required!

Once it's adjusted for your truck, trailer or van, you can put HOLDIT in place or take it out in seconds.

## Built for hard use, day in and day out.

HOLDIT is constructed of heavy-duty galvanized steel Allied® Flo-Coat® tubing. So you get a unit that's strong, durable and specifically protected against rust and corrosion.

HOLDIT is especially designed for people who need to resecure a load several times a day.
